On the other hand, it is asserted that the course of the New York democracy in the late election, wherein they succeeded on a hard money and free trade platform, carries the vote of the state delegation from Mr. Wood, who declines, either to Mr. Kerr or Mr. Cox; because Mr. Randall's endorsement of the Eric soft money platform contents. of the Erie soft money platform, and his votes and speeches in favor of a high tariff, for the past ten years, make it impossible for the delegation to endorse him, no matter what Mr. Wood advises. A Card. SENATE OF THE UNITED STATES, Office of the Sergeant-at-Arms, WASHINGTON, Nov. 28, 1875.

To the Editor of The Evening Star: In your columns, immediately after his death, you make the statement that the room at the Capitol, in which the Vice President died, presented a disordered, drear and neglected appearance; and accompany the statement with the intimation that this man, whom even the humblest em-ploye about the Capitol had learned to love as a kind and gentle friend, had through all his sickness been the subject of gross neglect, and at last died quite alone and almost for-

Tour cotemporaries of the Chronicle and the

story grows, until with the New York World story grows, until with the New York world the Vice President is left to sicken and die in the Capitol with less care and regard than a humane man would give his dying dog. And the nation is called upon by the World to rise up and utier its indignant protest.

When your reporter saw the room in which the Vice President died it had been put in preparation for the occupancy of the men preparation for the occupancy of the men who were to take a plaster cast of the face and the men who were to make a post mortem examination of the body, and the men who were to prepare the same for the funeral casket; put in order, but as one not aware o casket; put in order, but as one not aware of the purpose might think in disorder, by covering the carpets and furniture with rugs and loose cloths. This care your reporter mistook for neglect, and upon his own error he builds his supposition of other men's neg-lect of the Vice President through his sick-ness and death. Nothing could be farther from the truth, or more cruelly unjust to the kind-hearted and loving men who gave their days and nights through all that anxious fortnight to gentle and untiring ministrations by the bed-side of their dying friend, or to unbroken watchings at his door; and it is also very cruel to the Vice President's many friends through the country whose wounded hearts will gather new pain from such rumors of base neglect. such rumors of base neglect.

A more comfortable room, or more careful and faithful attendance could hardly be furnished a sick and dying man, than was

provided to the late Vice President.

The rumors are that England and Russia have already a mutual understanding on this point, and that it is the fruit of joint concessions by which the former secures a stronger hold of power in the East by controlling the gateway to it, and the latter finds an equivalent in the downfall of Turkey. MINERS WERE THROWN OUT OF EMPLOY-About two weeks ago Mr. Roberts, one of the roprietors of the Chauncy mine, noticed hat the roof of the opening was working in a most extraordinary manner, indicating that inside operations were attended with considerable danger to those engaged in digging coal in the different chambers or employed in the various gangways. He watched the phenomenon with the greatest interest and was finally convinced that

to certain calamity. About 11 o'clock on the morning of the 19th inst. he gave orders for the men to leave the mine as soon as possi ble and remove as much of the company' property as could be removed on the spur of moment. The miners, to the number of 124, left their work at 12 o'clock, taking with them the implements of their calling two hours later the mine caved in. Had it not been for the caution and foresight of Roberts a most fearful loss of life must have occurred, as the whole number of miner would have been entombed by about forty acres of rock, which crushed down and filled up the honey-combed opening beneath. THE DISASTER EXTENDED

to Grand Tunnel mine adjoining, the cave seeming to drag over the roof in a southerly direction, till stopped by a huge wall of rock known to mining engineers as "a fault, raised up between the Grand Tunnel and the adjacent mine, operated by the Susquehanna coal company. Into the Grand Tunnel some 60 or 70 acres of rock nave been hurled, effectually closing operations for months to come. The effects of the cave in TRULY TERRIFIC Huge boulders were thrown out of the mouth

of the tunnel by the compressed air as if

more desolation is to ensue in that quarter. THE LATE VICE PRESIDENT.
